

"I highly recommend Georgia Tech to anyone interested in mathematics, science, or engineering. Tech is the best bargain around. Even when I hate it, I love it. My job and school are very demanding and require a lot of discipline, but it is definitely worth it."

LISA PHILLIPS

Electrical Engineering

As a FASET leader, Lisa gets to introduce prospective students to Georgia Tech. She likes to show them what a typical day at Tech is like and answer any questions they might have about campus life. She is quick to encourage high school students interested in mathematics, science, or engineering to attend Tech. As a President's Scholar, she enjoys working with the National Merit finalists who come to visit the campus.

In addition to being an ambassador for Tech, Lisa is a junior pursuing a degree through the cooperative program in electrical engineering. Lisa obtained a security clearance in order to work at the Georgia Tech Research Institute as a research assistant in the countermeasures development division during her co-op quarters. After graduation, she plans to continue her education at Georgia Tech through the graduate program in electrical engineering.

During her high school years in Biloxi, Mississippi, Lisa was a member of the Spanish National Honor Society, president of the National Honor Society, and vice-president of Mu Alpha Theta. She also was a National Merit semifinalist and a participant in the Governor's Program.

At Georgia Tech, Lisa finds herself a busy member of E.E.E. and the Briaerean II honor society for co-op students.
